

AI 工具

- ChatGPT：這裡我安裝的是Genie App
- GitHub Copilot:
 - Set up an [GitHub account](#).
 - Install [Visual Studio Code](#), aka **VS Code**.

GitHub Copilot

What is GitHub Copilot?

- (Mostly) GitHub Copilot is an AI pair programmer that helps you write better code.
- A powerful tool to help write code/math related text in **Markdown** format. (Talk about Markdown later.)
 - [Markdown](#) is a lightweight markup language for creating formatted text using a plain-text editor.

設定

- To link your VS Code to your GitHub account, press `Ctrl+Shift+P` to open the Command Palette, then type `GitHub: Sign in` and press `Enter`.
- Install [GitHub Copilot extension](#) for VS Code.
